

Participation Stockholm Design Week

Participation

Stockholm Design Week

For participants at Stockholm Design Week 2022, we have developed advantageous packages, which include several opportunities for visibility and marketing. A novelty for 2022 is our new concept – The Library - where you can choose to combine participation in the city with being physically visible at the Stockholm Furniture & Light. The Library includes part of a curated exhibition space where you as a partner have a representative to meet visitors and create new contacts and business opportunities. The concept connects the Stockholm Furniture & Light Fair with Stockholm Design Week's activities in the city in a completely new way. Contact our sales department for more information.
